The birth of quantum industries

Abolfazl Bayat

Department of Physics and Astronomy, University College London

Abstract

Recently, many countries as well as giant companies, such as Google, Microsoft and Intel have started huge investments on quantum technologies. It is a very interesting era that quantum technologies are turning to industries. In this talk, I briefly give a review of the current situation and the perspective of next coming years. In particular, I will give an overview of the activities of four quantum hubs in the United Kingdom.
